

School's Cool... The 4th Monday in August.

Please support a school start date no earlier than the 4th Monday in August. Research shows no educational benefit to early-August school start dates. Energy costs have skyrocketed and the more school days eliminated in August the greater the financial savings — allowing taxpayer dollars to be spent on academic programming, teacher salaries and classroom supplies. A later school start date will also keep students off unairconditioned school buses during the hottest time of the year. A later school start date will also allow teachers more time to earn advanced degrees and obtain additional certification during the summer. And, the school year can still end in May, should the school board desire.

Thank you!
